INTERNSHIP

Software Engineer trainee ▶ Inclusive Services & Technologies Pvt. Ltd.

Developed web applications using PHP, MySQL, HTML, CSS, Jquery.

May 2019 – Oct 2001

PROJECTS

Weather Application

Developed a Web-Application that shows weather details of a particular city given with the help of OpenWeatherMap api and Mapbox api.

- Location co-ordinates are collected using Mapbox api by passing the location details.
- Weather details are colleted using OpenWeatherMap api by passing the co-ordinates.

Tools: Node.js, Express, HTML, CSS, OpenWeatherMap, Mapbox, Git

Github: https://github.com/rajkumar3934/weather-app

URL: https://raj3934-weather-application.herokuapp.com/

Easythali

EASYTHALI is a restaurant business in Hyderabad. They have various branches in Hyderabad. They need an application that shall permit users to enter a transfer transaction in bulk data entry format.

- Created a web application that shall permit users to enter a Transfer transaction in bulk data entry format and validate, Acknowledge and Reconcile.
- Developed an algorithm for parsing the data and best suggestions for a given input.
- Created Stored procedures.

Tools: PHP, Mysql, Javascript, Git

Eternal Green

Eternal Green deals with electric vehicles. They have a fleet of electric vehicle cars which are used by various clients like Google,UBER,etc,. So I developed a web application for managing cars, drivers and clients.

- Created forms using accordians.
- Used DataTables plug-in to display information in tabular form.
- Used Google Charts to display various graphs.

Tools: PHP, Mysql, Javascript, Git

Personal Portfolio

Develope a single webpage for personal portfolio which contains skills, certications, projects, resume etc.

Tools: Node.js, HTML, CSS, Javascript, Git.

Github: https://github.com/rajkumar3934/portfolio

URL: https://rajkumar-kakumanu-portfolio.herokuapp.com/

Front-End UI Application

Developed a responsive Front-End UI web application using Bootstrap which contains navigation bar, forms, tables, cards, tabbed navigation, Modals, Carousel, etc.

- Responsive web application.
- Css files are generated by creating Sass files.
- Various npm modules are used for minification, uglification of css and js files.

Tools: Bootstrap, HTML, Sass, Jquery, NPM, Git
